

Real-time calprotectin results

The home calprotectin test
for IBD patients

Results in
20 minutes

BIOHIT
Innovating for Health

SmarTest®

What is SmarTest?

A home calprotectin test for IBD patients. Simple to use, clinically validated and used by leading NHS IBD centres across the UK.

IVDR compliant

Accurate results comparable to laboratory analysis

No refrigeration required

Free clinician portal included

Powered by the free SmarTest app

NICE and BSG recommend
faecal calprotectin testing

at least
3x
per year

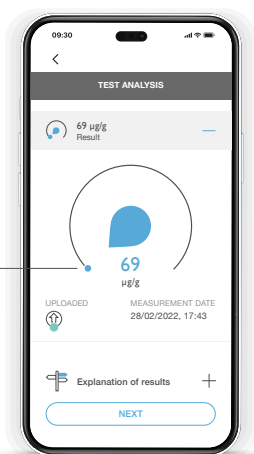

Results when they matter most.

Traditional calprotectin pathways can take 2-3 weeks. A lot can change in three weeks.

SmarTest delivers quantitative calprotectin results in under 20 minutes, automatically shared with your clinical team in real-time.

Measuring range: 35–2,000 $\mu\text{g/g}$.

Results in 20 minutes

Testing that works around patients.

Empowering patients.

Keeping clinicians connected.

Patients test at home, in their own time.

Results are instantly shared with their IBD team.

Free smartphone app
for iOS and Android

Pocket-sized kit,
room temperature storage

Results shared instantly
with clinical team

Saving IBD services time and money.

Less admin. Faster results.
Better outcomes.

The current calprotectin pathway is slow, labour intensive and costly for NHS services. SmarTest removes the admin, the chasing and the waiting – results arrive automatically in your portal.

Reduces nursing
admin and lab
workload

Supports early
flare detection

Reduced
postage costs

"The trust benefits from time and cost savings and fast delivery of results. We've been using the system for a couple of years now and it's amazing."
